

ELIS

LIS/LIMS SaaS by Big Rock Technology

Customized Cloud Based LIMS

The most Robust, Intuitive & Cost Effective LIS/LIMS (SaaS)

Big Rock Technology Group was formed in an effort to address the limitations in laboratory technology platforms.

ELIS LIS/LIMS SaaS was designed to be the most cost effective and robust cloud-based technology solution in the industry today. ELIS LIS/LIMS is driven by sound strategy and intelligent execution to create efficiencies around workflow, reporting, and compliance within a lab setting. Our primary goal is to provide our clients with more time to focus on their client's unique needs.

The intuitive design minimizes training, expedites the learning curve and requires no additional hardware for a seamless and hassle-free transition from your current technology infrastructure regardless of your hardware or software. With ELIS LIS/LIMS SaaS solution you get live, real-time visibility into all elements of your lab operations!

ELIS LIS/LIMS Standard Features

Robust Customization	✓
Rapid Deployment	✓
Intuitive Design	✓
Cost Effective	✓
Technical Support	✓
Secure Reporting/HIPPA Compliant	✓
Fully Automated Lab Workflow	✓
No hidden fees	✓
Unlimited Users	✓
Cloud Based	✓

Customizable

Cost Effective

Robust

Intuitive Design

With a rich background in both healthcare and technology, we created ELIS LIS/LIMS to be the most cost efficient and robust technology platform within the laboratory diagnostics industry. At Big Rock, we understand the nuances of both owning and managing a lab and the highly specialized requirements of all elements of lab operations, reporting and compliance.

Because of our unique background and experience as diagnostic laboratory owners and in the technology start up space, we understand the challenges and

limitations that lab owners, managers and directors may face with their current LIS/LIMS infrastructure. The ELIS LIS/LIMS unique approach addresses those limitations while adding feature sets, workflows and business intelligence that were previously unattainable in a traditional LIS or LIMS.

ELIS LIS/LIMS Testing Capabilities/Modalities

qPCR molecular testing

Hematology

Toxicology (LCMS, GCMS)

Immunology
